

TABLE 2. Assessment criteria for implementation and description of grades used

Assessment criterion	Excellent (5)	Good (4–3)	Satisfactory (2–1)	Fail (0) / Unfinished
Theoretical foundation	The theoretical foundation conveys the author's own, critical and creative thinking. It is carefully considered, topical and purposeful in terms of the nature of the work. A sufficient amount of key scientific/artistic research and specialist knowledge has been used for the theoretical foundation.	The thesis has a theoretical foundation and is based on versatile industry sources.	The thesis has a theoretical foundation and is based on industry sources.	The theoretical foundation is noticeably limited and selected uncritically.
Material and methodological choices	The material is diverse from the viewpoint of the objective of the work.  The acquisition of material and work methods are well-founded and their use is well-controlled.	The material is comprehensive.  The acquisition of material and work methods are well-founded.	The material is sufficient.  The acquisition of material and work methods are purposeful, and they have been described.	The material is insufficient.  The acquisition of material and work methods have not been described.
Treatment and analysis of material	The material is treated in a controlled manner and analysis is proficient. It shows a creative and systematic approach.	The treatment and analysis of material illustrates the author's familiarity with the subject.	The treatment and analysis of material is adequate.	The treatment and analysis of material is inconsistent and inadequate.
Results/Product	The results/product are new creations and original, the application of results has been proven and significance assessed.	The objectives set for the work have been justified. The achieved results/product can be applied to the development of the industry.	The objectives set for the work have been reached.	The objectives set for the work have not been reached. The results have been wrongly interpreted.
Conclusions/development proposals	Conclusions/development proposals were acquired by reflecting the student's own results to research and specialist data.	Conclusions/development proposals are ordinary.	Conclusions/development proposals are presented.	Conclusions/development proposals are missing.
