

Application to Professional Teacher Education institutions

Professional Teacher Education

Admission criteria in short in 2025

Application period: 8 January to 22 January 2025. Fill out the application form on Studyinfo.fi. Application period ends on 22 January 2025 at 15.00 (EET). The complete admission criteria can be found from Studyinfo -service from 31 October 2024.

Eligibility requirements in short:

- Applicants who seek qualification as vocational subject teachers are required to have a Bachelor's degree and three years of professional work experience corresponding to the degree on which the application is based.
- Applicants who seek qualification as vocational subject teachers in the field of Social Services and Health are required to have a UAS Bachelor's degree and five years of work experience in tasks corresponding to the content of the tertiary degree OR a Master's degree and three years of professional work experience corresponding to the degree on which the application is based. (Please note: A Bachelor's degree in the field of Social Services and Health which has been completed in a university – as opposed to a UAS – does not grant eligibility to apply for Professional Teacher Education).
- Applicants from the field of dance or circus are required to have a tertiary level degree or three years of relevant studies, and artistic or other professional experience from the field. In the application process to Professional Teacher Education, three years of professional work experience in the field is considered to correspond to this requirement.
- Applicants who seek qualification as general subject teachers are in most cases required to have a relevant Master's degree; no professional work experience is required.
- The requirement concerning the relevant tertiary level degree can be disregarded only if the applicant is acting as a vocational subject teacher during the application period and if section 13, subsection 2, of the Act 986/1998 applies. In such a case, five years of professional work experience is required.

Student selection based on the national admission point scoring system

The selection procedure is based on a national admission point scoring system. Applicants are admitted to the programme in the rank order of their total admission points within each admission group. Admission groups are based on fields of education (programme in Finnish) and separate admission groups. The maximum total admission points are 37. The degree and work experience required for eligibility will not be considered under the admission point scoring system.
